

J-TEK™ Treater Canvas Pants

JW11001

When you are looking for the best protection from arc fire and flash fire, J-TEK Treater Canvas Pants are the way to go. The 11 oz, 88% Cotton/12% Nylon Canvas fabric has an ATPV rating of 15 with a predicted 7% body burn. As with all of our Justin FR products, these Canvas pants are dual-certified to NFPA 2112 and 70E. Key design features include J-TEK performance, which incorporates knee, crotch, and waist articulation. Perform better with trusted high performance products from Justin FR.

Features and Benefits:

- A** Contoured waistband and back yoke prevents exposure while you bend and crouch
- B** J-TEK performance incorporates articulation in knees and crotch allowing the pants to move when you move
- C** Straight leg design is relaxed over the thigh, while fitting comfortably over work boots
- D** Two deep front notch pockets with leather trim at stress point for carrying a knife or a tape measure; bonus front inset pocket (right side only) for holding valuables in place
- E** Two large back pockets with wallet traps to secure valuables and prevent them from falling out
- F** Weather-washed for comfort right from the first wear

Fabric Construction: 11 oz 88% Cotton/12% Nylon Canvas fabric
